Patent No. 6013786

GENERAL INFORMATION:

APPLICANT: Sudhir Agrawal

APPLICANT: Ruiwen Zhang

TITLE OF INVENTION: MDM2-SPECIFIC ANTISENSE OLIGONUCLEOTIDES

NUMBER OF SEQUENCES: 9

CORRESPONDENCE ADDRESS:

ADDRESSE: McDonnell Boehnen Hulbert & Berghoff

STREET: 300 South Wacker Drive, 32nd Floor

CITY: Chicago

STATE: IL

COUNTRY: United States of America

ZIP: 60606

COMPUTER: BADABLE FORM:

MEDIUM TYPE: Ploppy disk

COMPUTER: BM PC Compatible

COMPUTER: NICOSOFT WORD 97

CURRENT APPLICATION DATA:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 6, Application US/09280805

Patent No. 6184212

GENERAL INFORMATION:

APPLICANT: Graham, Brett P. Monia

TITLE OF INVENTION: ANTISENSE MODULATION OF HUMAN MDM2

TITLE OF INVENTION: EXPRESSION

NUMBER OF SEQUENCES: 271

CORRESPONDENCE ADDRESS:

ADDRESSEE: Law Offices of Jane Massey Licata

STREET: 66 East Main Street

COTY: Mailton
